

*Tequila!*

Point 65 Sweden

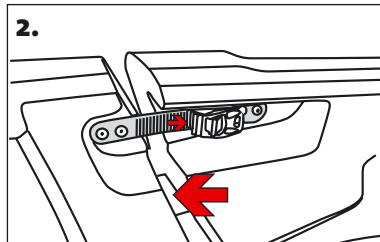

Manual

*This manual will help you with the basics of putting your Tequila! together for your next paddling experience. After some practice it takes literally 10 seconds to assemble your Tequila!. To take it apart you only need to reverse the process. Please read the warning sticker on your kayak for a safe and fun paddling experience. You will also find instructional films on [www.point65.com](http://www.point65.com)*

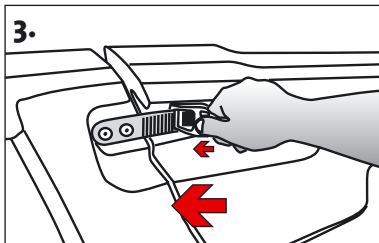

*happy paddling!*

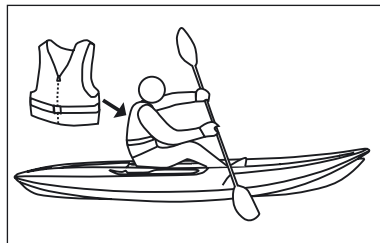

Place ratchet strap in correct position in buckle on both sides of the kayak

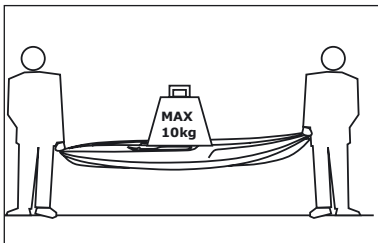

Push both parts of the kayak together, so that they slide easily together

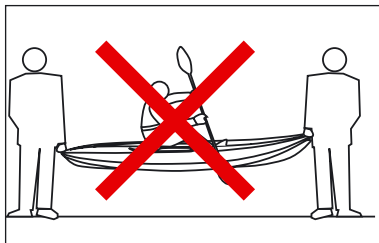

Pump buckle lever on both sides of kayak to close gap between parts. Do not overload buckle, this can damage the buckle lever and ratchet strap.

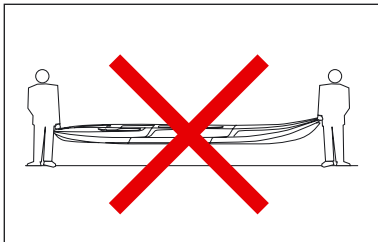

Always use a personal flotation device when paddling. Read warning sticker on kayak before usage.

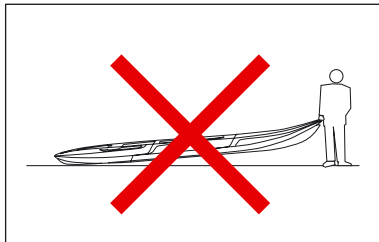

Never place heavy objects in the kayak while carrying, this can damage the locking system.

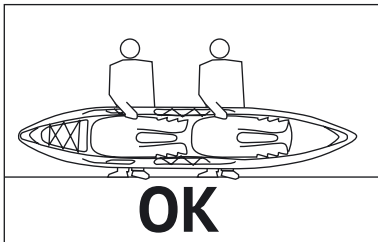

Never carry or drag the kayak with someone sitting in the kayak, this can damage the locking system.

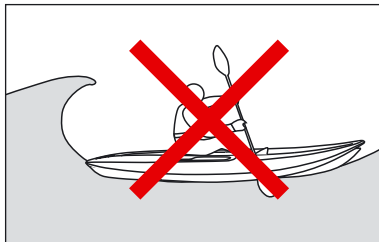

Do not carry the kayak as a tandem as shown in the image above.

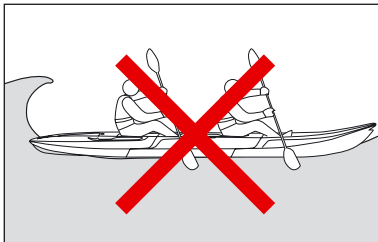

Do not drag the kayak as a tandem as shown in the image above.

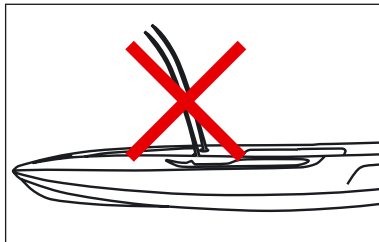

If carried as a Tandem, it should always be carried on its side as shown above.

Never paddle the kayak in surf larger than 5 feet in Solo, this can lead to damage in the locking system.

Never paddle the kayak in surf larger than 3 feet in Tandem, this can lead to damage in the locking system.

The round recesses behind seats are for backrests only. Never use them for fishing poles or similar objects.
